

# OOAN IS SOUL, IS EMOTION, IS MUSIC.

## **USER MANUAL**

## QWM-ISH/QWM-I HEADSET Single mic

www.oqanmusic.com

#### Products features

1.Unique intelligent ID recognition technology, can be distributed multiple microphone use. Digital analog mixed transmission, audio without digital transmission delay.

2.The Power of transmitter can be adjusted , suitable for various occasions, especially for KTV.

3.Infrared frequency technology makes the operation of transmitter simple and convenient.

4.UHF wireless microphone dedicated frequency band is adopted, which is free from interference of other industrial frequencies.

5.100 frequency points for selection, make full use if the existing radio frequency resources.

6.Super audio data pilot control can effectively prevent the interference of other frequency points and the impulse sound of transmitter switch.

7. The transmitter is powered by 2x1.5V batteries, which is convenient to purchase.

8.With balanced and unbalanced audio output, it is convenient to connect with various audio equipment.

9. When the transmitter with lower power, the red light starts flashing.

10.System dual transmitter configuration, convenient for use in various occasions.

11. Receiver display Transmitters parameter for easy monitoring .

#### Headset and Clip transmitter

- Power on/off
- **2** Volume rotation
- CD display
- Transmitting antenna
- **6** Battery cover

#### Common faults and solutions

#### 3. Microphone distortion

#### Reason

- Solution
- Receiver is normal.microphone is dropped or collision
- Transmitter sensitivity too high
- · Receiver audio output too high

#### 4. Howling

#### Reason

- Room switch and acoustic condition
- Microphone head face to speaker Hand holding the bottom
- Hand holding the infrared emitter properly or the tuning is
- defective.

- Check the battery power is enough or not.Or instead of new cartridge
- ·Adjust the sensitivity to a reasonable range
- Decrease the audio output level

#### Solution

- Adjust the position of the system accordingly
- Avoid placing the microphone directly into the speaker
- · Do not cover the infrared transmitting terminal of the microphone
- Check the amplifier and re-tune it according to the actual situation

#### 5, The receiver no output. and the transmitter and receiver display normally

#### Reason

#### Solution

- · Microphone device failure or microphone damage due to falling
- Change microphone

#### Notes

Thank you for buying our excellent wireless microphone series products. Before you use our peoducts please read this user instructions. This peoduct is a professional wireless microphone need to installed and maintained by gualified personnel. To learn more information in this guide is not listed, pleased call your local authorized dealer for more detailed information.

#### Using occasions

It is specifically designed for use in KTV and other vocal consent .

#### **Environmental Factors**

This products transmit data by RF,easy to be interfered by external wireless signal.All peoducts we manufactured are rigorously tested qualified products, such as the emergence of instant offer frequency etc. Phenomenon in the process of installing and using the vast majority of case is the system frequency peoducts by wireless signal source interference effect of the external environment. If you encounter the above situation, please carefully investigate following the external environment and internal environment of install interference factors, system setting, and make corresponding adjustment:

Whether the existense of places around the television transmissior tower, a large mobile phone transmitter base station or other strong sources of interference?

Whether install a cell phone signal amplifier?

Whether install high-frequency wireless intercom system or other brands od wireless microphone systems?

Whether is possible have signal shielded or weakened metal objects surrounding system?

Whether the receiver antenna is too close to the computer, VOD or other RF interference occurs machines?

Whether there are significant obstacles between the receiver and the transmitter

Whether surrounding environment is too wet.

#### **Common faults and solutions**

When the microphone appears silent or other abnormal phenomenon, the first thing to determine is the infinite microphone system or the problem of amplification system.

#### 1.No sound

#### Reason

- microphone Switch off
- Amplifier power switch off
- Receiver Switch off
- Volume button of amplifier
- on minimum position
- Speaker not connected well
- Holding the microphone
- bottom infrared emission.
- Microphone battery no power.

#### Solution

- Switch Turn on microphone
- Switch Turn on amplifier power
- Switch turn on receiver power
- To adjusted the volume of amplifier
- Check the connected line between speaker and amplifier/ receivers
- Do not hold the infrared emission
- Change the battery

#### 2. Wireless microphone noise

#### Reason

- Speakers line is not connected properly
- Signal interference
- Too small distance between
- moth and microphone head
- Amplifier line is not connected properly

#### Solution

- Check the lines between speaker and amplifier/ receivers
- Change the microphone frequency to avoid any interference
- Keep your mouth and microphone head in 15-20CM at least.
- Do not put the microphone to face your speakers.

#### Tips

- The battery should be used the original brand 1800ma AA rechargeable battery or other comman AA battery cause the battery jar is desidged according to the size of the ordinary AA battery. If use the battery more than 1800ma , it is to hard to take out the battery from the battery jar and it is easy to damage the battery jar of the handset.
- Please replace the battery when it is low,(the LED screen will shows the indication of low battery
- The antenna of the transmitter is placed at the end of the microphone. When using it, avoid holding the bottom of the microphone to avoid reducing its launching efficiency. Do not use both hands to hold the microphone to sing at the same time to avoid whistling.
- The circuit of this product has been precisely tested and adjusted before delivery to achieve the best performance. Do not disassemble, repair or adjust it, replace internal parts, otherwise it will lead to quality failure and may cause corresponding danger.
- During the use of the microphone, avoid the microphone directly facing the speaker. If the microphone directly faces the speaker, the sound reinforcement system forms a closed loop, which will generate positive feedback oscillation (commonly called howling), which must be avoided.
- After the transmitter is used, turn off the power immediately. If it is not used for a long time, remove the battery. If the receiver is not used for a long time, please turn off the power.
- Hand-held microphones should be waterproof when using them to avoid falling! The effect of the microphone in the water on the head and the line is fatal! The slamming microphone has a great influence on the head and internal components, and it is easy to cause some electronic components in the motherboard to be desoldered.
- Do not disassemble the microphone head. This will cause the sound head to loosen, produce noise, and seriously damage the sound head. Regularly clean the net cover and check the fastening screws on the net cover.

#### Handheld microphone(Transmitter)

1. Infrared synchronization window can receive synchronous data sent from the receiver, the transmitter to work in the frequency of the receiver. When using synchronization, at the same time, can only synchronize onemicrophone, other microphones can't use

as with the same frequency.

2. LCD display

Display frequency and battery usage, when nower is turned on LCD back light lit five sec

32

power is turned on , LCD back light lit, five seconds back light turns off.When the back light blinks

that indicate battery is dead, replace the batteries as soon as possible.

3. Power switch, mute button

Short press: power turn on, the power on Press mute / unmute. Press 3 seconds: turn off. 4. Transmit power adjustment

RF H high power, RF L low-power, short distance use, tuned to RF L

low-power state, to reduce the transmit power, interference from other devices and reduce power consumption, keep battery for longer time. 5. Intelligent mute switch

Short press the intelligent mute switch to turn on or off the automatic mute function, intelligent mute is turned on indicated (p) no indicated when turn off.

Intelligent microphone

#### In the intelliget microphone mode

1 .microphone automatically enters the mute mode when the microphone does not operate for more than 5 seconds, if microphone have the operation automatically resumes the working mode;

2. microphone does not operate for more than 5 minutes, the microphone automatically enters the sleep mode and stops transmitting signals to the receivering microphone have operation automatically enters working mode;

3. Microphone no operation for more than 15 minutes, the system will automatically turn off the microphone and need to be manually switched on to work normally.

#### SCREEN FOR HANDHOLDER MICROPHONE

① The indication for frequency.

2 "Mute" flashes that means it has been mute.

③ Indication for power of battery. It have to change to new one when \_\_\_\_\_ is flashing.

④ Intellingent microphone mute indication, turn on have this logo

#### **Battery replacement**

Counter clock wise rotation of the tube body to themicrophone, threads are screwed out, back to slide body is exposed out of the battery slot in the correct battery, replace the battery.

System microphone consist of acoustic devices and sophisticated electronic device, use with caution. When custody, forbid dropping, beat the sever impact, otherwise, microphone are easy to be broken.

#### System features

#### **RECEIVER PARAMETER**

Frequency range: 863~865MHz, 470~494MHz Channels: 6 or 80 Frequency interval: 300K Response: 50Hz~18KHz RF production: High-performance integrated IC RF bandwidth: 50MHz Signal to noise ratio: >105dB( A weight peak) Dynamic range: >100dB Distortion: <1.0% @1KHz Use temperature: -18~50 degrees Working range: 150 M Receive mode: High-performance integrated IC Sensitivity: >-105dB/M(20dB) Display: LCD Output: 1 Mixed/1 balanced

#### TRANSMETTER PARAMETER

RF frequency accuracy: ±5ppm <10KHz Nominal frequency offset: 20KHz Harmonics: <-45dB/c Output power: >10dB/m Display: LCD Current consumption: < 150mA @3V(Low power consumption) 200mA(High power consumption) Power supply: AA 1.5V x2

#### Packing list

1.Receiver:1pcs 3.Audiocable:1pcs 5.Antenna:2pcs 7.Instruction Book:1pcs 2.Hand-held microphone:1pcs 4.Power Adapters:1pcs 6.1.5V AAbattery:2pcs

#### **OQAN PRODUCT**

#### **USER MANUAL - EN**

Thank you very much for purchasing an OQAN brand product. We kindly ask you to please read carefully the user's manual that you can find in this link: **https://oqanmusic.com/downloads-no/** or capturing this QR code with your mobile phone to make sure you are doing a correct use of your equipment or instrument.

OQAN is committed to providing products of the highest quality, service and experience for the user for our clients so we incorporate our **Limited Warranty Extended from 3 years**. Remember to register your new OQAN equipment or instrument within ninety (90) days from the date of purchase to qualify for the extended warranty. This can be done quickly visiting: **https://oqanmusic.com/warranty**.

#### PRODUCTO OQAN

### MANUAL DE USO - ES

Muchas gracias por comprar un producto de la marca OQAN. Le rogamos lea atentamente el manual de usuario que podrá encontrar en este link: https://oqanmusic.com/downloads-no/ o capurando este código QR con su telefono móvil para asegurarse de estar realizando una correcta utilización de su equipo o instrumento.

OQAN se compromete a proporcionar productos de la mayor calidad, servicio y experiencia para el usuario para nuestros clientes por lo que incorporamos nuestra **Garantía Limitada Extendida de 3 años**. Recuerde registrar su nuevo equipo o instrumento OQAN dentro de los noventa (90) días a partir de la fecha de compra para tener derecho a la garantía extendida. Esto puede realizarse rápidamente visitando: **https://oqanmusic.com/warranty.** 

#### PRODUTO OQAN

#### MANUAL DE UTILIZAÇÃO - PT

Muito obrigado por comprar um produto da marca OQAN. Pedimos-lhe gentilmente leia atentamente o manual do utilizador que pode encontrar neste link:https://oqanmusic.com/downloads-no/ ou capturando este código QR com o seu telemóvel para ter a certeza de que está a fazer um utilização do seu equipamento ou instrumento.

A OQAN está empenhada em fornecer produtos da mais alta qualidade, serviço e experiência para o utilizador para os nossos clientes, pelo que incorporamos a nossa **Garantia Limitada Prolongado de 3 anos.** Lembre-se de registar o seu novo equipamento ou instrumento OQAN dentro de noventa (90) dias a partir da data de compra para poder beneficiar da garantia alargada. Isto pode ser feito rapidamente visitando: **https://oqanmusic.com/warranty.** 

### PRODOTTO OQAN

### MANUALE D'USO - IT

Grazie mille per aver acquistato un prodotto a marchio OQAN. Vi chiediamo leggere attentamente il manuale d'uso che si trova in questo link: https://oqanmusic.com/downloads-no/ o catturando questo codice QR con il cellulare per essere sicuri di fare una vera e propria l'uso del vostro apparecchiature o strumenti..

OQAN si impegna a fornire prodotti di altissima qualità, servizio ed esperienza per l'utente per i nostri clienti in modo da incorporare la nostra **Garanzia Limitata Esteso a partire da 3 anni.** Ricordatevi di registrare il vostro nuovo apparecchio o strumento OQAN all'interno di novanta (90) giorni dalla data di acquisto per beneficiare dell'estensione di garanzia. Questo può essere fatto rapidamente visitando il sito: **https://oqanmusic.com/warranty**.

### **PRODUIT OQAN**

### MANUEL D'UTILISATIONO - FR

Merci beaucoup d'avoir acheté un produit de la marque OQAN. Nous vous demandons de bien vouloir lisez attentivement le manuel d'utilisation que vous trouverez dans ce lien: https://oqanmusic.com/downloads-no/ou en saisissant ce code QR avec votre téléphone portable pour vous assurer que vous faites l'utilisation de votre l'équipement ou l'instrument.

OQAN s'engage à fournir des produits de la plus haute qualité, un service et une expérience pour l'utilisateur pour nos clients, nous incorporons donc notre **Garantie Limitée Prolongation de 3 ans**. N'oubliez pas d'enregistrer votre nouvel équipement ou instrument OQAN dans quatre-vingt-dix (90) jours à compter de la date d'achat pour bénéficier de la garantie prolongée. Vous pouvez le faire rapidement en visitant le site : https://oqanmusic.com/warranty.
